

Before and after

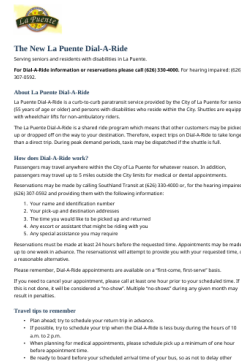

The New La Puente Dial-A-Ride: rider guide and registration form

City of La Puente · Tri-fold pamphlet, scanned, with a form · Original: [source PDF on the agency website](#)

Before

After

Fails PDF/UA-1: 9 rules, 10 failed checks

2 pages · 848 KB · not tagged · scanned image, no text

Passes PDF/UA-1 machine checks (veraPDF)

3 pages · 108 KB · tagged · 26 fillable fields

Main problems found

- No document title in metadata
- Content that is neither tagged nor marked as decoration
- No PDF/UA identifier (file does not declare itself accessible)
- Window shows the file name instead of the document title
- Not marked as a tagged PDF
- Tab order not set to follow the structure

What we did (OCR + LibreOffice rebuild with fillable fields)

- Original was a scanned tri-fold: no text, columns in fold order, form only printable.
- OCR, then rebuilt in reading order: about, how it works, tips, price, hours, holidays, phone numbers.
- Hours and phone numbers became data tables with headers.
- Registration form is now fillable: 26 labeled fields.

Still to do before delivery to a client: a person reads the file with a screen reader (NVDA) to confirm reading order and alt text, and the agency approves the rebuilt layout. Rebuilt files carry the same content as the original, not a pixel copy of its design.
